

BACKUP MADE EASY

Seneca's SBAR technology is the streamlined backup solution that helps integrators deploy and protect their Balto security appliances easily. Part of the Maestro optimization platform, Seneca Backup and Recovery captures a snapshot of your OS, apps, customizations and settings with three clicks, providing the flexibility to restore your systems to a factory image or from a snapshot all in one place.

SBAR works in concert with Maestro software, which orchestrates configuration and setup to get your system up and running in minutes instead of hours. With Seneca SBAR, you can quickly launch and create your backup all from a single intuitive dashboard.

You can restore to your fully optimized and configured backup in minutes instead of hours, making SBAR the most efficient backup solution on the market. It comes standard on the entire Balto lineup.
