FANLESS HD^N

Described as one of the industry's most compelling new products, the Seneca Fanless HDn transforms the Intel® NUC into an industrial-grade, long-life media player optimized for digital signage and edge applications. Purpose-built for retail, hospitality, quick-serve restaurant and kiosk environments, the Fanless HDn boasts a solid-state, integrator-friendly design.

Unlike other manufacturers who ship one-size-fits-all solutions, Seneca experts carefully plan and pair you with the right media player, scalable to meet specific needs. Each system comes equipped with Seneca's Maestro software , which loads and optimizes your CMS or analytics applications, saving hours of integration and setup time.

Designed and developed by Seneca's Advanced Engineering Team, the new Fanless HDn was created in the world-class Seneca testing facilities designed by Intel®. From inception, Seneca systems are tested in real-world digital signage and edge environments to guarantee maximum reliability in mission-critical installations.
