

# HD<sup>S</sup> MEDIA PLAYER

The Seneca HDs Media Player is a ruggedized fanless, single-output media player and embedded system designed to perform in the most demanding environments. With our purposeful design and feature sets, the Seneca HDs proves that big things really can come in small packages. With a custom BIOS and Tuned OS to guarantee mission-critical performance, the HDs offers great performance and reliability for digital signage applications.

Unlike other manufacturers who ship one-size-fits-all solutions, Seneca experts carefully plan and pair you with the right media player, scalable to meet specific needs. Each system comes equipped with Seneca's Maestro software, which loads and optimizes your CMS or analytics applications, saving hours of integration and setup time.

Designed and developed by Seneca's Advanced Engineering Team, the HDs was created in the world-class Seneca testing facilities designed by Intel®. From inception, Seneca systems are tested in real-world digital signage and edge environments to guarantee maximum reliability in mission-critical installations.

## THE SENECA DIFFERENCE

Standard with all Seneca media players, Maestro gets your optimized system up and running in minutes instead of hours. We channeled years of value engineering into an intuitive dashboard that eliminates hundreds of keystrokes. You don't even need an internet connection or data transfer from external drives.
