

xView Enterprise

Supports large control rooms and video wall projects

Designed to support some of the largest and extensive client viewing projects, the Seneca xView Enterprise appliance can handle it all. Purpose-built for these types of projects, the xView Enterprise is equipped with dual Intel® Xeon® Silver Series processors. With the ability to handle a high volume of cameras, this viewing solution can also power up to 16 monitors simultaneously.

All of the Seneca client viewing stations are built for the surveillance market. Understanding the high demands of a viewing solution, the xView Enterprise has been thoroughly tested with leading video management software (VMS) platforms. Integrators can rest assured the xView Enterprise will have exceptional performance for multiple monitor with extensive viewing workloads such as video wall control rooms.

Minimize disruption and ensure business continuity with Seneca's integrated backup and disaster recovery software.
