CONFIDENCE SQ100 SERIES NETWORK VIDEO RECORDER

ENTRY LEVEL VIDEO STORAGE APPLIANCE

The Seneca Experience puts the integrator first through innovation. We use decades of experience to accommodate our partners from planning and deployment to monitoring and post-sale support.

The Seneca Confidence SQ100 series NVR has advanced performance capabilities utilizing Intel Quick Sync technology. This technology provides more efficient video processing to improve throughput for video recording applications. The appliance combines simplicity and performance at an excellent cost to provide a robust, ready-to-use solution in a mid-tower or 2U rack server.
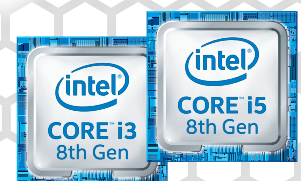

THE SENECA DIFFERENCE

xCONNECT
Remote Management Platform

Seneca's exclusive xConnect platform puts you in complete control of your security hardware with an easy-to-use dashboard that allows you to audit, manage and act remotely. Instant alerts report problems before customers do, making you more proactive. Off-site control means less truck rolls and more profitability.

maestro
Optimization realized

Also standard with all Seneca NVRs, Maestro gets your optimized system up and running in minutes instead of hours. We channeled years of value engineering into an intuitive dashboard that eliminates hundreds of keystrokes. You don't even need an internet connection or data transfer from external drives.
