PARTNERING WITH
Qognify

OPTIMIZED FOR OCULARIS

CERTIFIED BY QOGNIFY

GUARANTEED BY SENECA

Seneca and Qognify have joined together for one superior solution, making order to install quicker and easier while providing an outstanding customer experience to meet market demands.

WHAT IS THE QOGNIFY AND SENECA PARTNERSHIP?

- Seneca solutions are optimized and certified for Qognify Ocularis video surveillance software to ensure performance and compatibility.

- The Seneca certified solution is designed to provide an easy and simple configuration for the Ocularis software so projects can be on time and under budget.

SINGLE SOURCE

Seneca is your single source for Qognify Ocularis-optimized and certified hardware as well as Ocularis software. This partnership will provide you industry-leading software and hardware expertise that will ensure a unique solution capable of increasing your bottom line. We have the clarity, urgency and expertise to create the perfect physical security solution – and get it to you quickly. The Seneca hardware and software solutions for Qognify have been purpose-built and configured to enhance the server performance. They have been classified as certified hardware solutions by Qognify and are fully supported by both organizations. The ability to procure both hardware and software from us will make your ordering process seamless.

WHY SENECA?

Seneca is ideal for customers that want a trusted advisor with the experience and expertise to provide the right solutions, make the selection process easier and enhance the installation requirements. Seneca allows security professionals to engage with Qognify Ocularis projects through this alliance of technology and industry expertise, guiding them with proper solutions that helps them complete projects on time and under budget.

Our product selector removes the guesswork from the hardware decision process and provides the right solution specifically for the Ocularis application.

SENECA WITH OCULARIS INCLUDES

The Seneca servers come with the Maestro optimization platform that orchestrates configuration in a fraction of the time typical setup takes. You save hundreds of keystrokes and wasted hours. Seneca Backup and Recovery (SBAR) works in concert with Maestro, so you can quickly launch and create a backup all from a single intuitive dashboard. Finally, the xConnect remote management platform reduces service calls and increases profitability.
