Optimization realized

## Configuration and setup simplified

Our innovative Maestro software orchestrates configuration and setup to get your Seneca media player up and running in minutes instead of hours. We channeled years of value engineering into an intuitive dashboard that eliminates hundreds of keystrokes. The system optimization provides a higher-performing solution built for commercial application. We have partnered with industry-leading CMS applications and include the latest software version with Maestro for faster setup.

## Features

**Saves 100+ keystrokes**

**One click edge optimization**

**Seneca backup and recovery**

**Best in breed CMS applications**

**Immediate/remote support**

Purpose-built by the industry innovators, Maestro transforms your media player into a true appliance in about a half hour. It comes optimized for your application of choice and support is just a click away.

Maestro comes pre-installed and ready-to-use on all Seneca media players.

## Compatible with the leading CMS
