PHYSICAL SECURITY SOLUTIONS

ARROW

WHY SENECA?

Seneca

When you choose a Seneca product, you can trust our solution and be more profitable.

In an industry where uptime is critical, you can also trust that the Seneca name means our appliances deliver unrivaled dependability. From inception, Seneca systems are tested in real-world environments to guarantee maximum reliability in mission-critical installations.

We strive to be your trusted advisors in the security market. Our exceptional customer support starts at the

beginning, when your security specialist will assess your needs to connect you with the right appliance in terms of ability and scalability.

We want to find the right fit for your specific application. Seneca products are driven with your specific VMS, so you get a purpose-built security appliance.

maestro Optimization realized

Maestro gets your optimized system up and running in minutes instead of hours. We channeled years of value engineering into an intuitive dashboard that eliminates hundreds of keystrokes. You don't even need an internet connection or data transfer from external drives.

xCONNECT Remote Management Platform

Seneca's exclusive xConnect platform puts you in complete control of your security hardware with an easy-to-use dashboard that allows you to audit, manage and act remotely. Instant alerts report problems before customers do, making you more proactive. Off-site control means less truck rolls and more profitability.

SBAR Seneca Backup and Recovery System

The Seneca Backup and Recovery Enterprise feature can capture a snapshot of your OS, apps, customizations and settings easily with three clicks, providing the flexibility to restore your systems to a factory image or from a snapshot all in one place.

OPTIMIZED › CERTIFIED › GUARANTEED

OPTIMIZED

Seneca products are purpose-built, so you don't just get a server. You get a true security appliance for video surveillance. Our extensive experience in the security market allows us to intentionally select the optimal hardware to support specific VMS requirements like CPU, memory, GPU and network. This maximizes sustained throughput performance to prevent video loss and maintain image quality while eliminating costly processes with setup and configuration already complete.

CERTIFIED

Our products are tested and certified with your VMS to ensure system performance standards and compatibility. Throughput is specifically configured for security use. Utilizing our advanced engineering services (AES) facility to complete testing results, we can provide system recommendations for surveillance customers.

GUARANTEED

Knowledgeable Seneca people provide exceptional support for products that are guaranteed. We offer some of the best warranties in the business to back products we are proud to put our name on. Behind every Seneca security appliance, you'll find reliable support ready with solutions.

THE SENECA EXPERIENCE

The Seneca Experience puts the integrator first through innovation. We use decades of experience to accommodate our partners from planning and deployment to monitoring and post-sale support. Seneca doesn't just sell you a box. We offer an experience that gets you the perfect appliance for your application.

In an industry where tech and capabilities can easily be over-promised and under-delivered, we stand by a commitment to integrity and dependability. Your custom appliance arrives as specified, thoroughly tested in our world-class facility and backed by the best warranties in the business. Customer support is never far away with our next-business-day, on-site service and a U.S.-based call center filled with experts who can actually answer your questions.

Purpose-built and validated by top software developers, Seneca products come with an out-of-the-box experience that's second-to-none. We've channeled our experience into game-changing solutions like Maestro optimization software that orchestrates startup configuration in a fraction of the time typical setup takes. Seneca Backup and Recovery (SBAR) works in concert with Maestro, so you can quickly launch and create a backup all from a single intuitive dashboard. Standard and Enterprise recovery options are available. The xConnect remote management platform reduces service calls and increases profitability.

Seneca is your trusted advisor and true partner in the physical security market. We give you the same consideration that you provide to clients, carefully planning and pairing you with the right equipment.

PARTNERSHIPS

We understand that partnerships are important. We strive to partner with industry leaders to engineer better solutions to drive an easier experience for our customers. We choose them carefully and are proud of the relationships we have built. Our partners are an important piece in making us who we are.

SERVERS

Tuned and optimized by the Seneca Advanced Engineering Team, Seneca Servers offer seamless installation with video management software (VMS) platforms as well as leading camera manufacturers. Featuring best-in-class components with a warranty to match, Seneca Servers are designed to give you the power you need with the performance you can rely on.

VIEWING STATIONS

We understand the high demands of a viewing solution, so our viewing stations have been thoroughly tested with the leading video management software (VMS) platforms. Optimized for each VMS and the surveillance market, integrators can rest assured these viewing stations will have exceptional performance.

STORAGE

Every use case and function of our storage series has been calculated by our engineers to ensure a product that delivers best-in-class performance. Whether being used for VMS archiving or as an iSCSI target for servers hosting primary video or simply for general IT use, the benefits of Seneca storage appliances are endless.
