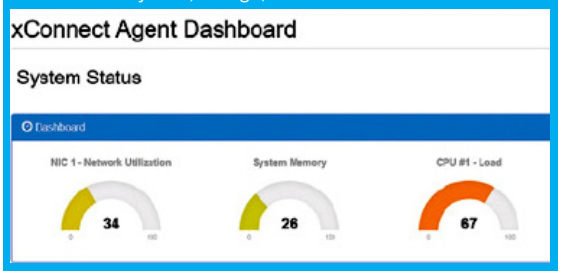
xCONNECT

Remote Management Platform

BE PROACTIVE AND PROFITABLE

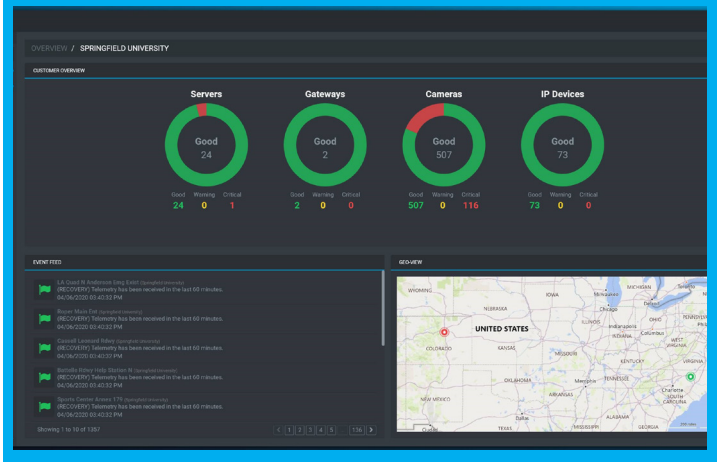
Seneca's innovative xConnect platform puts you in complete control of your security hardware with an easy-to-use dashboard that allows you to audit, manage and act remotely. Instant alerts report problems before customers do, making you more proactive. Off-site control means less truck rolls and more profitability.

Status view of system, storage, network and cameras



Similar software is expensive and complex with limited features. Purpose-built for physical security by the industry innovators, xConnect lets you easily monitor camera health, environment characteristics, performance utilization and system health using Seneca's ultra-secure gateway technology.

Real-time data to audit, manage and maintain security systems



Get email or push notifications about potential issues before hardware malfunctions happen. Fix problems remotely, reduce truck rolls and increase your bottom line. Create definitive reports for your customers.

The xConnect server agent comes pre-installed and ready-to-use on all Seneca NVRs in standalone mode. Cloud connectivity can be enabled in minutes.

AUDIT

- Temperatures, fan speeds and power supplies
- RAID controllers, physical, logical and virtual storage
- System utilizations
- Application monitoring
- Network bandwidth analysis
- VMS log analysis

MANAGE

- Clientless remote desktop
