THE SENECA EXPERIENCE

Seneca puts the integrator first through innovation. We use decades of experience to accommodate our partners from planning and deployment to monitoring and post-sale support. Seneca doesn't just sell you a box. We offer an experience that gets you the perfect appliance for your application.

In an industry where tech and capabilities can easily be over-promised and under-delivered, we stand by a commitment to integrity and dependability. Your custom appliance arrives as specified, thoroughly tested in our world-class facility and backed by the best warranties in the business. Customer support is never far away with our next-business-day, on-site service and a U.S.-based call center filled with experts who can actually answer your questions.

Purpose-built and validated by top software developers, Seneca products come with an out-of-the-box experience that's second-to-none. We've channeled our experience into game-changing solutions like Maestro optimization software that orchestrates startup configuration in a fraction of the time typical setup takes. Seneca Backup and Recovery (SBAR) works in concert with Maestro, so you can quickly launch and create a backup all from a single intuitive dashboard. Standard and Enterprise recovery options are available. The xConnect remote management platform reduces service calls and increases profitability.

Seneca is your trusted advisor and true partner in the physical security market. We give you the same consideration that you provide to clients, carefully planning and pairing you with the right equipment.

maestro
Optimization realized

Maestro gets your optimized system up and running in minutes instead of hours. We channeled years of value engineering into an intuitive dashboard that eliminates hundreds of keystrokes. You don't even need an internet connection or data transfer from external drives.

xCONNECT
Remote Management Platform

Seneca's exclusive xConnect platform puts you in complete control of your security hardware with an easy-to-use dashboard that allows you to audit, manage and act remotely. Instant alerts report problems before customers do, making you more proactive. Off-site control means less truck rolls and more profitability.

SBAR
Seneca Backup and Recovery System

The Seneca Backup and Recovery Enterprise feature can capture a snapshot of your OS, apps, customizations and settings easily with three clicks, providing the flexibility to restore your systems to a factory image or from a snapshot all in one place.
