

xView Value Series

Performance-packed for remote monitoring in smaller settings

The Seneca xView Value series client workstation is designed specifically for small, entry-level security applications. Purpose-built for physical security, the xView Value offers a low-cost solution that provides the performance required for high-definition video.

Seneca makes setup simple. Quickly install your preferred VMS on the appliance and apply settings for optimal playback – no internet required – with our proprietary software. Minimize disruption and ensure business continuity with Seneca's integrated backup and disaster recovery software.
